Describe

Drying ovan with one door

Function:

- 1.The material of Oven adopts 1.2mm stainless plate with zinc which meets National Standard,and inner adopts zincification Perforated sheet
- 2.The inner of oven,we have total three types, layer type,cart type and hanging type(you can choose one type by yourself)
- 3.Air supply style: horizontal type, Upper and lower type,left and right type, assembled type(optional)
- 4.The circuit of oven is automatic timing alarm new circuit
5. Electronic components adopts import or domestic high-top accessories.and also it has cooling system to make sure electrical is working under common temperature
6. Equipped with a three-phase protection and a overcurrent protection device
- 7.Import insulation cotton, good insulation, save electricity,It can save 30% electric power changes than another common oven(it meet environmental requirement)
- 8.Import high temperature gland strip, good durability(imoprt silicon gel)
- 9.It adopts especial wind channel,Taiwan motor,low noise,wind power stronger, up/middle/down temperature error is controlled 1 ~ 2°C

Technical parameter:

- 1.Small inner size:600*600*700mm
- 2.Large inner size: 600*600*1500mm
3. Intelligent thermostat: double display,A. Setting temperature B. The actual temperature
4. Temperature scope: 0 ~ 300°C
- 5.Input power: 380VAC/50Hz(three phase four-wire system+ ground wire)
6. power rating: 5.50/KW
7. Machine weight:150kg
8. Application: the machine is suitable for drying and curing kinds of plastic products,hardware , electronic components etc.
- 9.Outside of machine is toast paint(top grade computer white)
- 10.glass window.whole shelve that would carry approx. 30kg.
