

DLWD-ETBE12D-II Advanced Electrical Technology Know-how Training Set

Product Description

■ Overview

● This device fulfills the content and standard of low voltage electrical, motor and relay control circuit required by the advanced maintenance electrician training and examination skills, it can satisfy the relevant requirements of professional skill appraisal in the senior maintenance electrician skill examination.

■ Technical Parameter

- Total dimension: 1840×800×1570mm
- Capacity: <1.5KVA
- Input power: three-phase, five-wire AC380V±10% 50Hz/60Hz
- Output power: AC 380V, AC 0~220V multi AC safety terminal output
AC 220V Safety socket output ,DC1.25-30V±1% safety terminal output
- Optional
 - DLWD-ETBE12D-I Middle level Electrical Maintenance Skill Training Series
 - DLWD-ETBE12D-III Electrical Maintenance Skill Training Series
