Can be adjusted to match the height of the item to be measured.

No.178-039

Vertical adjustment range: 250mm
Dimensions: 400x250x578mm
Mass: 20kg

Options for simple column stand

Three new optional products are available to be attached to the manual column stand (No.178-039). You can choose the unit that suits your application. Or, you can also use the three products in any combination. Using the optional units makes SJ-411/412 more convenient and easier to use to ensure accurate measurements.

•Auto-set unit (178-010)*

This unit enables the vertical (Z axis) direction to be positioned automatically (auto-set function).

A single button operation completes a series of operations from measurement, saving and auto-return (saving and auto-return can be switched on and off by operating the drive unit).

•X-axis adjustment unit (178-020)*

This unit helps fine-tune the horizontal (X axis) direction.

•Tilting adjustment unit (178-030)*

This unit is used for aligning the workpiece surface with the detector reference plane. It supports the DAT function to make the leveling of workpiece surfaces easier.

Complete set of optional units for the manual column stand

*Cannot be used when the tester's main unit is an older model (SJ-401/402).
