Paint film abrasion tester

L-JM-V

1. Brief introduction of the application of paint film abrasion tester

JM-IV paint film abrasion tester refers to the United States Taber wear tester, combined with the actual use of domestic standards BG/T1768-79, ISO7784-2, mainly suitable for the determination of paint film abrasion resistance, under a certain load after a specified number of grinding rotation, the weight loss of paint film (G).

2. Parameters of paint film abrasion tester

1. Working disc speed: 60 +/- 2 RPM
2. Sample glass wafer: 100*8*3mm
3. Motor power: 25W 220V 50HZ
4. Rubber grinding wheel: 50*12mm(outside diameter * thickness), 100#, 120#
5. Display, counting window: 9999 four digits

3. Main configuration of paint film abrasion tester

- A. 1 main engine (abrasion tester)
- B. One auxiliary machine (grinding machine)
- C. 1 vacuum cleaner

Attachment:

1. Vacuum cleaner interface 1
2. Loading weights:

Weight: 250g, 500g, 750g

Grinding wheel balance weight: 20g (pin shaft, installed), 20g, 10g, 5g, 2g, 1g

The above two configurations are 16 in total

3. 2 power cables
4. Rubber grinding wheel 100# 120# 4 each
5. Round glass (test plate) 5 pieces
6. One copy of operation instruction
